

APPRENTICESHIPS AT

**RESPONSIVE
ENGINEERING**

Your future starts now.

In partnership with local colleges and training providers, we offer apprenticeship programmes that help to develop and shape the engineering talent of the future.

Being a Responsive Engineering Apprentice will give you the skills and knowledge you need to excel in the manufacturing sector, regardless of the apprenticeship route you follow.

**Learn the skills to become a METAL FABRICATOR,
PLATE WELDER or a MACHINIST.**

Join us to help defend, power and explore the world.

Find out more.

Armstrong Works, Scotswood Road,
Newcastle Upon Tyne, NE15 6UX

WHAT'S INVOLVED?

- Study towards the Metal Fabricator, Plate Welder or Machinist Apprenticeship Standard.
- Develop foundation engineering skills through practical learning with our partner providers.
- Receive mentorship from an industry expert to guide and support you through your apprenticeship journey.
- Gain hands on experience through practical workshops, lessons and informal drop-in sessions.

ENRICHMENT

Our core values are key to our workforce. By offering development and enrichment opportunities, apprentices can thrive and exceed expectations. As an apprentice, you can take part in community projects, charity events, local school and college engagement, whilst promoting the exciting careers available to young people from across the region.

WHY JOIN US?

At Responsive Engineering our employees are at the heart of everything we do and we offer the following benefits to them:

- 25 Days Holidays per year + Bank Holidays
- Company Pension Scheme
- Death in Service Life Insurance Scheme
- Personal Injury Scheme
- Health Cash Plan
- Totum Apprentice Student Card
- Free Onsite Electric Vehicle Charging
- Salary Sacrifice Schemes including cycle to work
- Onsite Parking
